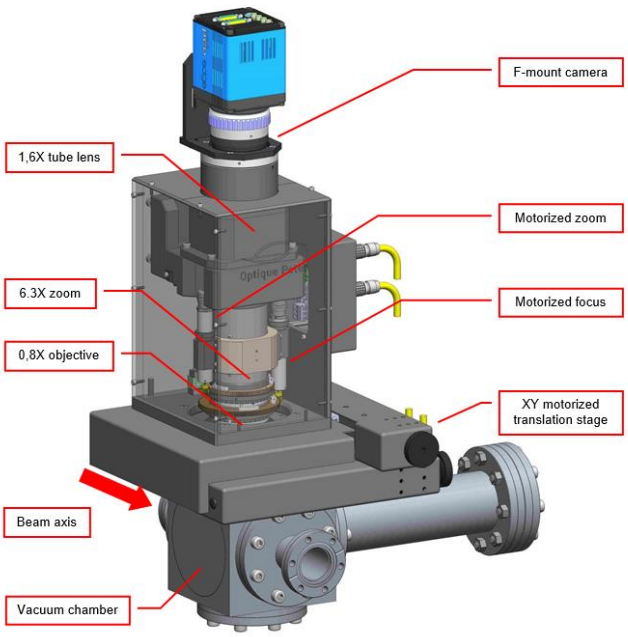
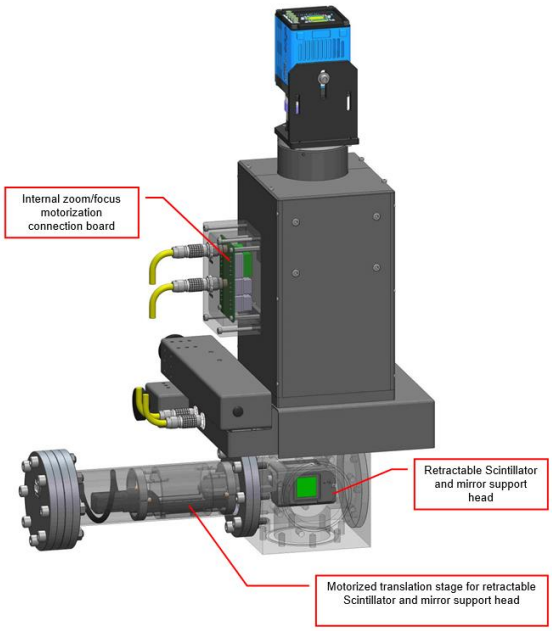
OPTICAL & MECHANICAL ENGINEERING

X-RAY BEAM DIAGNOSTIC

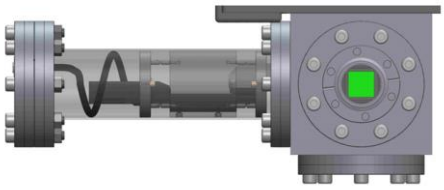
- In vacuum X-Ray beam imaging systems
- Retractable scintillator
- Different optical configurations :
    - Single magnification system
    - Zoom system on 2 axis motorized stage for high resolution imaging on the whole scintillator surface

In Vacuum beam diagnostic X-Ray imaging zoom

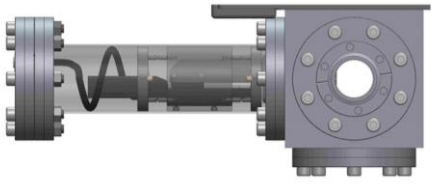




- 6,3x or 16x motorized zoom magnification ratio
- In vacuum retractable scintillator support
- Zoom on XY stage for whole scintillator surface imaging at any magnification



Scintillator support in the beam



Scintillator support removed from beam
